

**Minden Gardnerville Sanitation District
District Manager's Report
August 2010**

1. EDU allocations: No EDU's were purchased during the month of July.
2. Grease Receiving/Co-Generation Project: The grease receiving project is progressing on schedule, with the contractor now waiting on the arrival of equipment to finish installation. It was discussed with NDEP and Dave Pivetti, the feasibility of a masonry wall along the Ironwood entrance drive to shield the grease receiving station. The wall would be aesthetically pleasing and would match the existing wall at the entrance. NDEP has agreed to supply the funding for the proposed wall.
3. Bond Resolution update: On the upcoming agenda is a request for amendment of the bond resolution for the grease receiving project. When additional funds were allocated for the project, it became necessary to amend the bond amount. It is a simple procedural step that can be taken at the meeting.
4. Weed Removal: The weeds have been removed from the fencing areas between the plant site and Westwood Homeowners property.

Frank T. Johnson
